

# Crown Prince Hussain Bin Abdullah II Intersection

ATCCO • Four-Level Mega Interchange

A flagship infrastructure project executed by ATCCO between **2008 and 2011**. This four-level interchange includes a major elevated bridge, two multilane underpasses, retaining walls, utilities diversion, and traffic management systems.

# Project Overview

**Client:** Greater Amman Municipality (GAM)

**Consultant:** Consolidated Consultants Group (CCG)

**Duration:** 2008–2011

This landmark interchange dramatically improved Amman's traffic flow. The design incorporates a high-capacity bridge, advanced stormwater systems, lighting, barriers, upgraded road geometry, and complete urban finishes.

## Project Timeline

### 2008 – Mobilization

Site setup, traffic detours, utility investigations.

### 2009 – Underpass Works

Deep excavation, shoring, concrete structures.

### 2010 – Bridge Execution

Columns, caps, girders, post-tensioning.

### 2011 – Finishing

Asphalt, lighting, signage, safety systems.

# **Additional Key Infrastructure Projects**

## **Airport Highway – Eighth Circle Tunnel**

Major urban traffic improvement works including a multilane tunnel along the Airport Road corridor.

## **Construction of Roads and Bridges at Zarqa Stream Area**

Comprehensive roadway development with bridge structures along the Zarqa Stream basin.

## **Jamal Abdel Nasser Intersection and Sports City Square Tunnels Project**

Complex tunnel and interchange works enhancing traffic flow at a strategic metropolitan node.

## **Airport Highway Pedestrian Bridge**

Design and execution of a pedestrian overpass along the Airport Highway.
